

pure hydration

Break free from the pack

What is it?

The Armoured Reservoir is a novel new idea from Purehydration, which gives you all the benefits of a hydration pack in a simple reservoir.

How?

We have taken our open topped reservoir design and recreated it using our unique Armour Weave material.

Armour Weave is an extremely hardwearing material we use on some of our military products. The durability of this weave is incredible and resists tears and puncturing no matter how heavy handed the user is.

Why?

The Armoured reservoir is ideal if you want the hands free convenience of a hydration pack, without having to carry a whole separate system with you.

The reservoir's toughness allows you to put it into any backpack or Bergen, put it in your webbing or simply in a pocket and reap all the benefits of a full hydration pack.

Open Top:

The Armoured reservoir comes with a resealing top so you can open it up and clean it, literally, inside and out.

Inline:

The Pure Hydration Inline Filter can be installed into the PureLink connectors to turn your hydration pack into a water purifier capable of cleaning 350Litres of water on the go.

PureLink Compatible:

Like most of our reservoirs, the Armoured Reservoir comes already fitted with PureLink connectors installed into the delivery tube.

This means you can easily plug any of our PureLink compatible accessories into the reservoir of your hydration pack to broaden your horizons.
